

# Tika

**Just wanted to provide an update on our newest family member, Tika, who we adopted in March. There had been some concern about her acclimation to a house with a toddler and 1 year old dog, but Tika has made herself right at home and has proven to be more confident than we all anticipated!**

**We tried to follow the recommendation to keep her in her own little space for the first couple of weeks she resided with us....but by day #2 she was ready to go out and explore the rest of the house, which she did of her own accord. Now she has her own comfy hiding/snoozing spots (especially my closet, pictured) when she doesn't feel like socializing with our dog Emmett or our daughter Anna (with whom she is very patient), but she also roams around wherever she pleases, and sleeps comfortably curled at the foot of our bed every night. We're so happy that she seems to feel right at home already and we love her!**
