

# Katie

**A little background: Katie is yet another animal that was hit by a car and left to suffer. Fortunately for Katie, someone found her and brought her for medical attention. Her accident resulted in the loss of one of her back legs.**

**Katie is now known as Sasha and is in her forever home. The following is an update from her guardian:**

***“Doesn't she look wonderful?! Thank you again. I hope to spend many, many years enjoying, loving and caring for Sasha (aka Katie) and her housemate Sole.”***

***I would like to add the fact that Sasha is NOT 3 years old, but a total juvenile, getting into everything. She may be about 1.5 yrs at most! Amazingly, she is light as a gazelle and can leap counters and obstacles in a single bound! She is fond of almonds, and food in general is numero uno in her life. She did manage to get on the counter the other night and eat a piece of a lovely blueberry cake, that I had been looking forward to. Oh well...***

***She is incredibly feisty and the two cats tussle and race each other and then bat and wrestle. It's hard to tell if it is play or warfare!. She does have the squeakiestmiauw, which is often non-stop. I may call her 'squeakers' instead! But she is a beautiful animal and I am glad I am able to give her a new home.***
